EXECUTIVE AI BRIEFING / HUMAN JUDGMENT

EMOTIONAL INTELLIGENCE IN AI LEADERSHIP

Read the human signals behind adoption. Test their meaning. Make an accountable decision.

THE LEADERSHIP DECISION

Listen to what people are experiencing, then use evidence to decide what the business should change. Empathy is not agreement; adoption is not a login count.

FOUR ADOPTION SIGNALS — FOUR DIFFERENT INQUIRIES

01 RESISTANCE

WHAT MAY BE HAPPENING
Concern about job security, autonomy, professional identity or unresolved risks.

EXECUTIVE RESPONSE
Ask what the person is trying to protect. Test whether the work or decision rights must change.

02 SKEPTICISM

WHAT MAY BE HAPPENING
Doubts about reliability, business value, safety or promises that were not delivered.

EXECUTIVE RESPONSE
Invite specific failure cases. Compare the output, corrections and costs with a baseline.

03 LOW ENGAGEMENT

WHAT MAY BE HAPPENING
Unclear relevance, competing priorities, fatigue or little say in the process.

EXECUTIVE RESPONSE
Examine the actual workflow and managerial support. Remove practical barriers.

04 UNEVEN AI LITERACY

WHAT MAY BE HAPPENING
Different experience, confidence and ability to judge AI limitations.

EXECUTIVE RESPONSE
Set role-specific practice: verify output, protect data, escalate and remain accountable.

AN EXECUTIVE RESPONSE FRAMEWORK

01
RECOGNIZE
Notice the signal, without diagnosing a person.

02
UNDERSTAND
Explore competing explanations and real work.

03
RESPOND
Choose an action proportional to the cause.

04
VERIFY
Check changes in work, trust and outcomes.

FIVE CAPABILITIES EXECUTIVES CAN PRACTISE

SELF-AWARENESS
Notice defensiveness and assumptions.

SELF-REGULATION
Stay calm when the project is challenged.

PERSPECTIVE-TAKING
Consider the roles and consequences affected.

CONSTRUCTIVE CHALLENGE
Test claims instead of defending or dismissing.

RELATIONSHIP JUDGMENT
Keep challenge safe and accountability clear.

EXECUTIVE PROOF

Show the concern, competing explanations, owner, chosen action and evidence of changed work.
