EXECUTIVE OPERATING MODEL / JAIR RIBEIRO

AI & Data Governance

From trusted data to accountable AI at scale

Decision rights · Trusted inputs · Lifecycle evidence · Responsible operation

DATA GOVERNANCE

Ownership · Stewardship · Quality · Definitions
Lineage · Access · Privacy · Retention

AI GOVERNANCE

Purpose · Risk · Oversight · Transparency
System evidence · Monitoring · Response

ACCOUNTABILITY BY DESIGN

Purpose · Trusted data · System behavior · Named authority · Evidence

01 DECISION TESTS

BOUNDARIES
What can the system do?

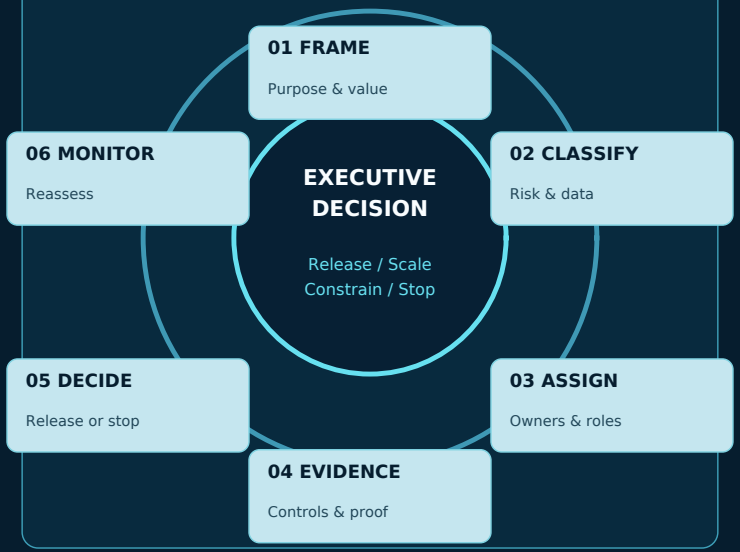

ACCOUNTABILITY
Who owns the consequence?

EVIDENCE
What proof justifies use?

TRACEABILITY
Can we reconstruct it?

02 CONTINUOUS LIFECYCLE

Purpose → Risk → Ownership → Evidence → Decision → Monitoring

03 DECISION OWNERS

Business owner
Value & consequence

Data owner / steward
Quality & permitted use

Product / technology
Security & readiness

Risk authority
Risk acceptance

Portfolio authority
Scale, revise or stop

Operating owner
Incidents & thresholds

04 OPERATING MECHANISMS

Trusted inputs
Sources, quality, lineage, access

Decision ownership
Authority, rights & escalation

Control by consequence
Risk tier, human oversight

Traceable outcomes
Versions, sources, decisions

Monitoring after launch
Drift, exceptions, thresholds

Material-change review
Model, data, users or purpose

05 SEVEN APPROVAL QUESTIONS

1. **Purpose** — What changes if AI is wrong?
2. **Data** — Who owns its permitted use?
3. **Accountability** — Who owns and can stop it?
4. **Boundaries** — Where must humans decide?
5. **Evidence** — What supports risk acceptance?
6. **Traceability** — Can outcomes be reconstructed?
7. **Monitoring** — What triggers intervention?

06 CHANGE & RESPONSE

01 DETECT
Data, behavior or scope shifts

02 ESCALATE
Notify decision authority

03 REASSESS
Review evidence and controls

04 ACT
Continue / Constrain / Stop

EXECUTIVE ASSURANCE

KNOW
Where AI is used

OWN
Who is responsible

EXPLAIN
Why it happened

RESPOND
When to intervene

Governance is not a one-time approval.

It is a continuous system of accountable decisions.
