

JAIR RIBEIRO

Enterprise AI & Data Leader | Strategy, Governance, Adoption & Business Value

Gothenburg, Sweden | jair.ribeiro@outlook.it | +46 76 761 21 58

[linkedin.com/in/jairribeiro](https://www.linkedin.com/in/jairribeiro) | AI & Data Portfolio

EXECUTIVE PROFILE

Enterprise AI, data and analytics leader with 20+ years in enterprise technology, including 8+ years in AI, data and analytics leadership. Experience spans AI strategy, operating models, portfolio decisions, governance, analytics, adoption and business translation across automotive, consumer goods and enterprise technology environments. My work increasingly focuses on connecting business priorities with the data, governance, ownership and adoption conditions required to make AI useful at enterprise scale.

CORE LEADERSHIP & DOMAIN EXPERTISE

Enterprise AI strategy | AI & Data operating models | AI & Data CoE design | AI governance & Responsible AI | AI portfolio prioritization | Data strategy, governance & trust | GenAI enablement | Analytics strategy | Product & portfolio leadership | Value discovery & business cases | Enterprise architecture | Cloud & AI solutions | Adoption, literacy & change | Executive stakeholder management | Management consulting

SELECTED LEADERSHIP IMPACT

- Across Volvo AI roles, shaped and supported 100+ AI initiatives, proofs of concept and projects across multiple regions and business functions.
- Designed and delivered AI literacy and adoption activity reaching 1,000+ employees, with broader enterprise communities engaging 1,500+ practitioners.
- Worked across business, data, technology, governance and risk stakeholders to move AI opportunities from early discovery toward governed, usable enterprise capability.
- Built practical experience across AI strategy, portfolio governance, operating-model design, data foundations, responsible adoption and scale-readiness.

PROFESSIONAL EXPERIENCE

AI & Data Center of Excellence Director | MSX International

Dec 2025 - Jun 2026 | Gothenburg, Sweden

- Built foundations for a business-facing AI & Data Center of Excellence connecting AI strategy, data governance, responsible adoption and enterprise scale-readiness.
- Structured AI opportunity and lifecycle governance with clearer stages, ownership, decision points and criteria for moving initiatives toward investment and scale.
- Advanced data-governance foundations covering ownership, stewardship, data quality and trusted-data practices.
- Partnered with strategy, operations, technology and business leaders to make AI priorities, dependencies and next decisions clearer.

Data Analytics and AI Leader | Volvo Group / Volvo Trucks

Aug 2022 - Dec 2025 | Gothenburg, Sweden

- Led AI and analytics adoption across commercial operations, including warranty, sales and aftermarket, translating business needs into practical AI use cases and workflow improvements.
- Designed practical AI literacy and adoption activity reaching 1,000+ employees and supporting responsible use of generative AI.
- Led cross-functional use-case and proof-of-concept work across commercial and corporate functions, coordinating business, Digital & IT and specialist stakeholders.
- Connected use-case discovery, adoption, governance and enterprise delivery realities rather than treating pilots or training volume as the outcome.

Artificial Intelligence Strategist - EMEA | Kimberly-Clark

Jul 2021 - Sep 2022 | Krakow, Poland / EMEA

- Led value discovery and realization for AI and Data Science opportunities across EMEA, connecting business priorities with feasible AI opportunities.
- Worked in a global role reporting to the Chief Data & Analytics Officer and supporting the company ambition to become more AI-driven.
- Partnered with functions including supply chain, manufacturing, sales, marketing and logistics to shape use cases around business value and readiness.

Senior Artificial Intelligence Business Expert | Volvo Group

Jun 2018 - Jul 2021 | Wroclaw, Poland

- Led business requirements, product management and stakeholder work across a large portfolio of AI initiatives, proofs of concept and projects in multiple regions.
- Delivered 100+ sessions and training opportunities to strengthen AI literacy across the global Volvo Group.
- Supported enterprise AI community and Center of Excellence activity, engaging 1,500+ practitioners and connecting use-case demand with technical teams and practical adoption.

Cloud and AI Project Manager | IBM Watson Solution Designer | IBM

Jul 2017 - Jun 2018 | Wroclaw, Poland

- Applied IBM Design Thinking to frame customer problems and shape technology solutions around user and business needs.
- Worked as an IBM Watson Solutions Designer, advising sales teams and supporting the development and positioning of cognitive and AI solutions.

EARLIER CAREER

AI, Cloud, IT Consulting & Infrastructure Roles | IBM, Hewlett Packard Enterprise and earlier employers

2004 - 2018 | Italy, Brazil and Poland

- Built a broad technology foundation spanning AI and cloud projects, IBM Watson solution design, virtualization, data centers, enterprise systems and IT delivery.
- Worked across consulting, architecture, infrastructure, client engagement and project delivery in multicultural environments.

TECHNICAL & ENTERPRISE FLUENCY

GenAI | Large Language Models (LLM) | Agentic AI | Enterprise AI architecture | Analytics | Data platforms | Data quality | Stewardship | Cloud | MLOps principles | Security | AI risk | Governance | Scalability | Vendor evaluation | Cost / accuracy trade-offs | Operational readiness

EDUCATION

Selinus University of Sciences and Literature - MSc, Artificial Intelligence

Research focus: Responsible AI Adoption in Global Enterprises | Oct 2025 - Jun 2026
